

TP Vision launches mid-range best-in-class wireless noise-cancelling Philips headphones

Berlin 5th September 2019 – TP Vision announces a Philips over-ear noise cancelling headphone with high-end specifications at a mid-range price.

Excellent audio performance, noise-cancelling, comfort, design and build quality will all be available with the launch of the new Philips **PH805** headphone.

- **PH805** brings premium performance, build and features to the mid-segment of the over-ear wireless ANC headphones market
- **Advanced Digital ANC technology** allows the PH805 to offer a huge -27db reduction to cancel over 95% background noise
- Easy-to-use thanks to the choice of touch controls, physical buttons and basic voice control
- Despite its clever folding, the PH805 is one of the lightest models in the over-ear wireless ANC sector, weighing in at just 235 grams
- High-quality 40mm drivers deliver HRA accredited hi-resolution performance

Noise Free Enjoyment

PH805 headphone's **Advanced Digital ANC hybrid technology** uses four ECM microphones - two feed-back microphones inside the earcup and two feed-forward outside the earcup – to bring noise cancelling performance that can cancel out up to 27dB or 95% of background noise.

Street noise, background sounds, transportation noise or human voices are all dramatically reduced or cancelled. The earcups feature ergonomic ear cushions made of soft memory foam, which together also offer excellent passive noise cancellation.

This combination of active and passive noise reduction leads to the elimination of unwanted ambient sound to leave the user with a totally uninterrupted, noise free listening experience.

Full Control

The earcups also feature both easy-to-use physical buttons and touch controls - swiping up or down on the right earcup controls the volume and basic voice assistant functions, while a single tap activates or deactivates ANC or lets you engage Awareness Mode to hear more of the world around you as your music continues to play.

Using the physical buttons, you can select: play, pause, skip forwards or backwards or perform simple call features.

Sound quality

The audio sound the Philips PH805 reproduces is excellent thanks to large, high-quality 40mm neodymium drivers capable of hi-resolution levels of performance - with an HRA accredited wide bandwidth of 5Hz to 40KHZ. This allows users to enjoy the music how the musician envisioned it.

Light and cleverly foldable

Despite the high levels of performance and features, the PH805 is one of the lightest models in the over-ear wireless ANC sector, weighing in at just 235 grams, while a unique, clever folding design allows the headphone to be either folded compact or flat, making the PH805 perfect for travelling and easy to store.

And more ...

Bluetooth 5.0 wireless connectivity enables users to enjoy all of their music from phones, tablets or laptops, in high-quality and free from any wires. Battery life is an impressive 30 hours – more than enough for even the longest trip - while fast charging means a further two hours of playback can be available in just five minutes.

The PH805 also have the option of a wired connection and are supplied with an extra audio cable to allow the headphones to be continued to be used without battery power - and ensure connection to airlines' inflight entertainment systems.

The end result is better music, with less noise, more comfort and with complete freedom of movement, all in an attractive, compact, closed back design.

About TP Vision

TP Vision is a consumer electronics key player in the world of audio-visual digital entertainment. TP Vision concentrates on developing, manufacturing and marketing Philips branded TV sets (Europe, Russia, Middle East, South America, India and selected countries in Asia-Pacific) and audio products (all around the Globe). We do this by combining the innovative Philips brand heritage with our design expertise, operational excellence, flexibility and speed of TPV Technology. With these combined strengths, we bring high-quality TV sets to the market: smart and easy to use with sophisticated styling. We believe in creating products that offer a superior audio and visual experience for consumers. With Philips TVs, TP Vision is a global leader in the hospitality market. TP Vision is the exclusive brand licensee of Philips TVs for the above listed countries and, on the global stage for the Philips audio products. TP Vision employs close to 2,000 people in several locations around the globe and is 100% owned by TPV, one of the world's leading monitor and LCD TV manufacturers, selling and marketing Philips branded TVs in China. TPV has been able to drive its growth over the years by leveraging its economies of scale and core competencies in R&D, manufacturing, logistic efficiency and quality.
