

Morpho

Morpho is a series of elastic modular floor panels that create a more efficient and connected atmosphere for the next generation of bathroom users. Underneath lies a mechanism that deforms these panels with multiple configurations depending on the user's needs or mood. It is mainly targeted to help and prevent 3 main issues tough future daily bath activities: Water Consumption, Emotional responses and Safety issues. Inspired by natural interactions and geometries, these adaptive panels can perform many predetermined configurations. For example, Morpho can recreate a mini beach scape for the kids, to a safe bath layout for an older audience.

Dynamics

The system creates different geometries to form scenes and with water, provides a natural replacement of the traditional bath practices, therefore reducing water consume with just the essential for each desired activity.

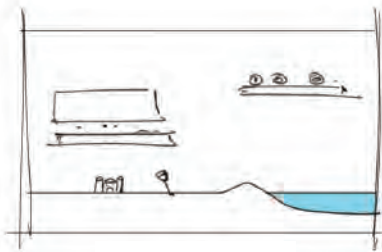

Mimics

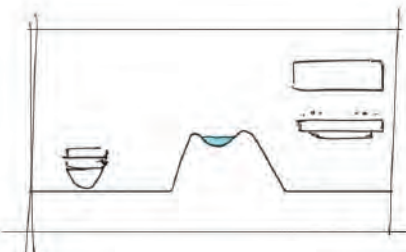

Surface patterns are generated to assist users in terms of safety, experience or even medical conditions. From relaxing after a stressful day to simply reading your favorite book by the beach, Morpho can provide the perfect bathroom experience.

Experience

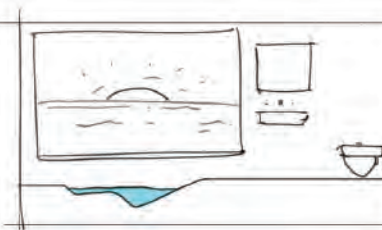

Morpho creates multiple configurations based on experiences, needs or moods, making the bathroom a new place for all age future experiences.

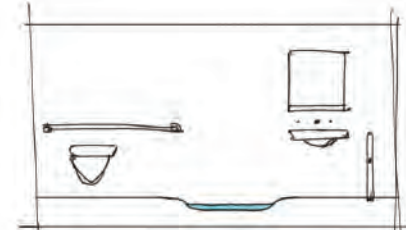

Kids beach

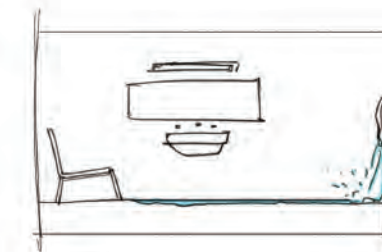

Babies pond

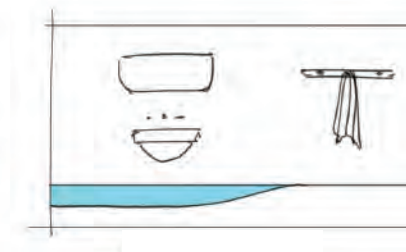

Sunset relax

Grandpa's bath

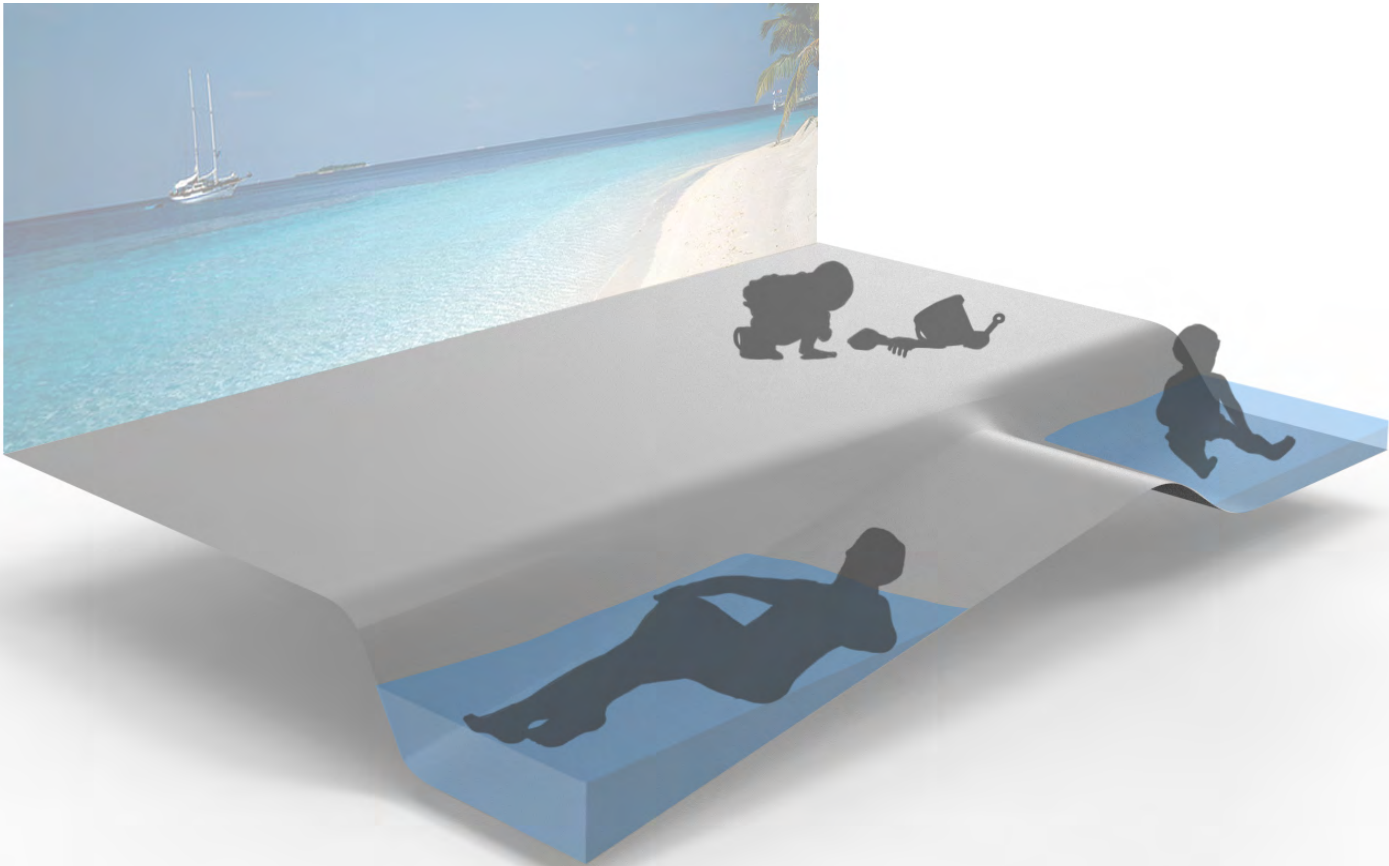

Forest reading

Infinite sea
