Net Absorption Sets Quarterly Record With Flurry of Q4 Logistics Leasing; 2021 Industrial Outlook Is Bright

Demand: The U.S. industrial market finished the year remarkably strong with 89.8 million square feet (msf) of net absorption, the strongest single quarter ever recorded. This brought the year-to-date (YTD) total to 268.4 msf, surpassing the 240.9 msf reported at year-end 2019 by 11.4%. Warehouse/distribution space proved to be the strongest secondary type, carrying the U.S. industrial market through the year, absorbing 267.4 msf. The overall total was brought down slightly due to manufacturing and high-tech space ending the year with negative absorption. Of the 80 markets tracked by Cushman & Wakefield, seven markets saw more than 10 msf of positive net absorption, and 17 markets registered over 5.0 msf of positive net absorption by year-end.

New leasing activity in Q4 was 178.8 msf, propelling the annual total to an all-time high of 659.1 msf. More than half of the U.S. markets tracked by Cushman & Wakefield—43 of 80—posted year-over-year (YOY) increases in new leasing activity. Additionally, 18 markets saw more than 10 msf of net new leasing activity, and 42 markets saw over 5.0 msf of new leasing activity by year-end. Among the key drivers stimulating this level of activity was digital sales, sparking more e-commerce leasing, as well as third-party logistics providers that occupy warehouse/distribution space. New leasing activity in logistics space accounted for 566.5 msf, which represented 86% of all new leasing activity across all product types by the end of the fourth quarter.

Supply: New supply totaled 352.9 msf in 2020—a 5.7% increase YOY and the most space ever delivered as reported by Cushman & Wakefield. On a quarterly basis, 97.3 msf delivered in the fourth quarter of 2020—a little over 5.0 msf shy of the record quarter in 2019 that saw 102.3 msf, the strongest quarter ever reported. Supply has continued to outpace overall demand since 2019, and by year-end 2020, supply surpassed demand by a little over 84 msf. Even so, vacancy rates remained tight across markets. Of the 80 markets tracked by Cushman & Wakefield, 54 markets produced over 1.0 msf of new industrial construction by year-end 2020. Of those markets, 10—Dallas/Fort Worth, Houston, Atlanta, the Pennsylvania I-81 & I-78 Distribution Corridor, the Inland Empire Chicago, Phoenix, Indianapolis, Memphis and Columbus—had more than 10.0 msf of construction deliveries, accounting for 56.8% of all new completions in the U.S. industrial market at Q4 2020. Considering those 10 markets also accounted for more than 60% of net absorption at year-end, new supply remains largely concentrated in markets where demand has been consistently strong.

SPACE DEMAND / DELIVERIES

OVERALL VACANCY & ASKING RENT

Vacancy: In the fourth quarter of 2020 the U.S. industrial vacancy rate increased 30-basis points (bps) YOY to 5.2%. Vacancy remained flat quarter-over-quarter and is still 60 bps below the 10-year historical average of 6.6% for all product types. Despite vacancy increasing slightly YOY, the market welcomed the new quality space available as demand surged in the second half of the year. The rise in vacancy is alleviating some—but certainly not all—of the pressure on the supply constrained markets. The tightest U.S. markets continued to be Orange County, Nashville, Central New Jersey, Los Angeles, Tulsa, Philadelphia, Hampton Roads and Boise—all of which reported vacancy rates at 3% or under in Q4 2020. More broadly, overall vacancy rates remained lowest in the West and Northeast regions at 4.4% and 4.7%, respectively.

Rents: The continued tight market conditions and solid demand brought on another quarter of YOY rent growth at Q4 2020, increasing 4.6% from the fourth quarter 2019. At \$6.76 per square foot (psf), Q4 2020 became a new record high rental rate for the U.S. industrial market. Warehouse/distribution rents rose 5.6% during the same period to \$6.22 psf. The Northeast set the pace for overall industrial rent growth among the four regions at 8.8% YOY, followed by the West with a 5.5% growth YOY. Quarter-over-quarter, 61 industrial markets saw positive rent growth or held steady while 63 markets saw an increase or held steady YOY. Though the pace has slowed slightly over the past several quarters, positive rent growth will continue through the end of the year.

Construction Pipeline: The current industrial construction pipeline has reached 360.7 msf, another new record high for the market. Of the industrial product under construction, 337.1 msf (93.5%) will be warehouse/distribution product. Despite the brief pause developers took towards the end of Q1 and into Q2, the pipeline has now expanded 5.8% over Q3 2020, the most recent quarter to hold the title of record high pipeline, and about 6.6% over Q3 2019. The South continues to be the region with the largest construction pipeline, with nearly 146 msf (40.5% of the total pipeline) under construction at Q4 2020. Though the pipeline may look as though it is showing the possibility of oversupply, the ratio between speculative and build-to-suit (BTS) space tells a different story. At Q4 2020, the industrial market had only 57.3% of speculative space under construction, leaving BTS space at 42.7%, a much more conservative pipeline ratio than we have seen in recent quarters. Just over 42% of the industrial space under construction is pre-leased. The remainder of the available pipeline has enough new supply to provide occupiers with additional options for growth but not so much as to drastically shift the vacancy rate, derail rent growth or undermine asset values.

Outlook

- Solid demand will continue. Net absorption will continue to exceed 200 msf in 2021.
- Supply is expected to continue to outpace demand in the coming quarters. Industrial supply is likely to produce around 40% more space than can be absorbed, bringing quality space to the market for occupiers to consider.
- New supply will place upward pressure on overall vacancy with the rate rising 30-to-50 bps to between 5.5% and 5.7% in the next couple quarters.
- Asking rents will continue to increase with positive YOY growth, but new supply and more modest demand will be headwinds that moderate the pace of overall rent growth.

VACANCY REMAINS FLAT QUARTER-OVER-QUARTER

SPEC SPACE MODERATING

SOLID GROWTH CONTINUES

Methodology

Cushman & Wakefield's quarterly estimates are derived from a variety of data sources, including its own proprietary database, and historical data from third party data sources. The market statistics are calculated from a base building inventory made up of industrial properties deemed to be competitive in the local industrial markets. Generally, owner-occupied and federally-owned buildings are not included. Single tenant buildings and privately-owned buildings in which the federal government leases space are included. Older buildings unfit for occupancy or ones that require substantial renovation before tenancy are generally not included in the competitive inventory. The inventory is subject to revisions due to resampling. Vacant space is defined as space that is available immediately or imminently after the end of the quarter. Sublet space still occupied by the tenant is not counted as available space. The figures provided for the current quarter are preliminary, and all information contained in the report is subject to correction of errors and revisions based on additional data received.

Explanation of Terms

Total Inventory: The total amount of industrial space (in buildings of a predetermined size by market) that can be rented by a third party.

Overall Vacancy Rate: The amount of unoccupied space (new, relet, and sublet) expressed as a percentage of total inventory.

Direct Vacancy Rate: The amount of unoccupied space available directly through the landlord, excludes sublease space.

Absorption: The net change in occupied space between two points in time. (Total occupied space in the present quarter minus total occupied space from the previous quarter, quoted on a net, not gross, basis.)

Leasing Activity: The sum of all leases over a period of time. This includes pre-leasing activity as well as expansions. It does not include renewals.

Overall Weighted Asking Rents: NNN average asking rents weighted by the amount of available direct and sublease space in industrial properties.

W/D: Warehouse and/or distribution properties.

MFG: Manufacturing properties.
